

## **Food Allergen Information**

Butternut Mountain Farm does not process any of the major food allergens as defined by the US Food Allergen Labeling and Consumer Protection Act of 2004 (Title II of Public Law 108-282) which includes: eggs, milk, wheat, soy, peanuts, tree nuts, fish, and shellfish.

Pure maple sugar is produced solely from pure maple syrup, which is derived solely from pure maple sap. Safflower and canola oils are used as processing aids in the sugarhouse. They reduce foam in the evaporator pan as the sap is being boiled and concentrated to syrup. They are present in the finish syrup in trace amounts.

Please feel free to contact me at (802)888-3491 should you have any additional questions regarding allergens and our pure maple syrup or pure granulated maple sugar.
