SPECIAL FIRE FIGHTING PROCEDURES Avoid creating airborne dust with high pressure water streams; use fine spray to saturate spills			
UNUSUAL FIRE HAZARDS Supports combustion only poorly; however, the relative explosion hazard of the dust is severe. As with any finely divided organic solid, dust may be explosive if mixed with air in critical proportions and in the presence of an ignition source. Dry dust can be electrostatically charged by turbulence, pneumatic transport, pouring, in exhaust ducts and during transport.
